

Korea's Fight Against COVID-19

TRUST

T

Transparency

Korea's testing and diagnostic capabilities are outstanding, delivering results within hours. It runs over 19,000 tests per day and releases the data instantaneously.

R

Robust Screening and Quarantine

Korea aggressively maps and tracks infected cases. Self-quarantines are strictly monitored and enforced - violators risk imprisonment and fines.

U

Unique but Universally-applicable

Korea uses IT technology and drive-through testing sites to minimize contact. Mobile apps track the condition and movement of infected individuals.

S

Strict Control

Korea prohibits individuals who have been in contact with confirmed cases from exiting Korea during the 14-day self-quarantine period.

T

Treatment

Korea provides advanced medical care to confirmed patients. Treatment is free-of-charge for both Koreans and foreign nationals.
